

ALLMEDS EHR

EXTENDED PROFILE

OVERVIEW

AllMeds EHR is used by surgical specialties across the United States, and is designed for small to medium sized practices

AllMeds EHR was designed to dramatically improve practice workflows and efficiency, reduce the amount of administration and documentation and improve practice profitability. Functionalities include e-prescription, billing, reporting, collection management and processing of insurance claims.

It was designed to dramatically improve practice workflows and efficiency, reduce the amount of administration and documentation and improve practice profitability.

As part of the suite, AllMeds EHR features ExpressHX, a module which enables clinicians to copy patient information from existing forms and automatically upload it to the database. Further data can be captured from patients through a secure PatientHX portal.

An e-prescription module allows physicians to automatically transmit prescriptions to pharmacies chosen by their patients while the EDInsight module assists with the submission, tracking and management of insurance claims.

AllMeds HER also includes billing functionality, collection management and reporting modules which allow healthcare professionals or administration staff to prepare business and financial reports to help with practice development and decision making as well as targeting specific areas to improve revenue.

AllMeds is an on-premise modular based EHR system. The system offers a variety of integrations and support services, including an EHR replacement service.

FEATURE OVERVIEW

- ✓ Patient Demographics
- ✓ Patient Portal
- ✓ Scheduling
- ✓ Appointment Management
- ✓ Billing Management
- ✓ Medical Templates
- ✓ Document Management
- ✓ Clinical Workflow
- ✓ EM Coding
- ✓ Insurance and Claims
- ✓ Lab Integration
- ✓ Patient History
- ✓ Patient History / EMR
- ✓ e-Prescription
- ✓ E&M Coding
- ✓ Insurance & Claims
