CLARITY EHR

EXTENDED PROFILE

Clarity

OVERVIEW

Clarity is an EHR solution designed specifically to work with the clinical workflows used by dialysis clinics. It is developed and marketed by Visonex.

Clarity EHR's web-based system allows clinics and clinicians 24-hour access through a browser interface that is constantly updated to the latest version without any user reconfiguration. Clarity is a scalable EMR solution, suitable for both small clinics - the company says its smallest client has 12 dialysis patients - as well as the largest; with some of Clarity's clients serving more than 2,000 patients.

Clarity's payment plan does not include upfront fees or long-term contracts. Customers are able to opt out of the solution with 90 days' notice and billing is on a pay-as-you-go basis.

Visonex has integrated clinical practice guidelines into Clarity EHR and these are not hard-coded, meaning that they can be updated and adapted as the guidelines are changed. Clarity also has a data exchange built in which prevents clinics from having to duplicate data entry and reporting. It complies with Medicare requirements that all health facilities participating in Medicare submit data to satisfy conditions for coverage for end-stage renal disease.
