

CLINICSOURCE

EXTENDED PROFILE

OVERVIEW

ClinicSource EMR system can be accessed via the cloud or installed on-premise. It is a specialty EMR for use by speech and physical therapists as well as mental health practices. The ClinicSource EMR suite also includes a customizable billing module.

ClinicSource has a series of customizable reporting templates, designed for practices that offer multiple types of therapy, all data is entered once so that a patient's details are available to all staff throughout the workflow right up to billing. The billing process itself can be customized around individual patients and integrated with the systems of both insurance providers and clearing houses.

ClinicSource gives practice staff the ability to sync schedules with the most popular calendar formats including Google Calendar, Outlook, and iCal. Patients themselves are sent reminders of appointments the day before they are due either via email, SMS, or both.

The solution is web-based and its templates are supported on iOS and Android mobile devices.

ClinicSource is available on a pay monthly contract with prices on a per-user basis. As well as the option of using the hosted version of the solution on ClinicSource's servers, practices can also install and host the solution on their own servers.
