# ECLIPSE EHR

EXTENDED PROFILE

OVERVIEW

ECLIPSE is an EHR suite that is used by thousands of chiropractic, physical therapy, and medical offices across the US. Designed to speed up workflow and improve patient outcomes in practices of all sizes, it is mainly used on large sites with hundreds of users and up to 150,000 patients.

ECLIPSE is also used by many small practices thanks to its user-based pricing plan. It boasts a host of integrations allowing users to create custom forms, manage patient workflows and billing, check eligibility, and the ability to sync its scheduler with a smartphone in real-time via the Google calendar.

One of its main features is the ability for a user to open multiple patient files without having to close others, retrace their steps or undo previous actions. ECLIPSE says that this reduces the number of clicks that a user has to make to access data of interest and makes it easy to use for front-desk staff.

All data is updated in real-time, so documents open at multiple locations are all updated instantaneously, allowing more than one member of medical staff to be working on a patient record at the same time.

FEATURE OVERVIEW

✔ Patient Demographics

✔ Patient Portal

✔ Scheduling

✔ Appointment Management

✔ Billing Management

✔ Medical Templates

✔ Document Management

✔ Clinical Workflow

✔ Patient History

✔ Reporting and Analytics

✔ Patient History / EMR

✔ Reporting / Analytics
