

MEDEZ®

EXTENDED PROFILE

OVERVIEW

MedEZ® is an electronic health record (EHR) and billing suite suitable for most medical facilities, particularly behavioral health centers and substance abuse rehabilitation programs. On-premise and cloud-based deployments are available. MedEZ® includes a daily scheduler and a "to do" task pad. It features single- and multiple-doctor scheduling screens, resource schedules, email and text notifications, a waiting list and group appointments. MedEZ® also offers HIPAA compliant patient records, documentation, practice management, a patient portal and billing. Users can take clinical notes and record billing codes. Document and DICOM image management tools are also included, as well as a module to retrieve and store lab results and a pharmacy module that includes pharmacy inventory management. MedEZ® billing allows users to create hard-copy and electronic claims in CMS1500 and CMS1450 formats. Users can manage co-pays, deductibles and adjustments. Revenue cycle management, claim tracking, utilization review and cost reporting tools are also included.
