

REMEDY EHR

EXTENDED PROFILE

OVERVIEW

As a dedicated bariatric EHR, Remedy EHR offers web-based solutions accessible on Windows 7 and 8 platforms. Remedy EHR can be integrated with laboratories allowing the automatic sending and receiving of results. The systems can also monitor a patient's vital signs and generate alerts when necessary.

The solution can capture and present vital sign trends and generate reports for diagnostic procedures. It can be integrated with supported laboratories so that orders can be sent automatically and results received without user intervention. A patient's vital signs can be monitored and reported on as well as alerts for other conditions including excess weight loss.

Further automation includes support for e-prescribing and the generation and tracking of referral and consulting letters, patient care plans, and operative reports.

Other modules within Remedy EHR have been designed for practice dieticians to add, price, track, and receive reports on a clinic's supplement inventory. Plus view and analyze patient data including demographics and scheduling, clinical history plus insurance, and financial information.

Remedy EHR, which is only supported on Windows 7 or 8 desktops and laptops, is web-based, allowing users to access it from anywhere 24 hours a day.

FEATURE OVERVIEW

- ✓ Patient Demographics
- ✓ Appointment Management
- ✓ Billing Management
- ✓ Patient History
- ✓ Patient History / EMR
