

RXNT EHR

EXTENDED PROFILE

OVERVIEW

RXNT's integrated, cloud-based Electronic Health Records (EHR) solution helps practices of all sizes and specialties, from small family practices to large multi-location physician providers across the United States. Our EHR optimizes patient care and streamlines workflows, allowing real-time health and prescription history at the point of care. It's HIPAA compliant, Surescripts compliant, satisfies MACRA, and is both MIPS- and ONC-certified.

Physicians can share real-time clinical data with patients and other clinicians for better care coordination and next-step support. Patients benefit from the ease of the Patient Portal—schedule appointments, send secure messages, review lab results, sign documents and forms, and pay bills online.

RXNT offers an integrated full suite of award-winning, certified healthcare software. In addition to our EHR, RXNT's products include Practice Management (PM) with Medical Billing and Scheduling and Electronic Prescribing (eRx). Every product is backed by 24/7 cloud-based access, premium in-house support, and regular system upgrades.
