

TRAKNET

EXTENDED PROFILE

OVERVIEW

Built on the Microsoft SQL Server platform, TRAKnet incorporates billing, charting, and scheduling into a single system, and aims to offer podiatrists an effortless transition from scheduling to patient encounters to claims and billing. TRAKnet EHR offers a full range of functionalities specifically engineered to meet the needs of podiatry practices, including charting, a patient portal, e-prescribing, and an ICD-10 conversion tool.

TRAKnet EHR can be integrated with TRAKnet Professional Billing, an outsourced podiatry billing service exclusive to TRAKnet customers. This system includes a comprehensive range of billing features, including claim submission and management, collection from third-party payers, plus processing of all insurance information, with customer support available via a specialist podiatrist billing center.

To offer practices extra flexibility, TRAKnet is available as both a cloud and on-premise solution, with cloud users having access to an Android app and a web app. This TRAKnet system is priced on a provider-per-month basis and offers discounts for additional users.

TRAKnet Professional Billing is an outsourced podiatry billing service exclusive to TRAKnet customers.

FEATURE OVERVIEW

- ✓ Patient Demographics
- ✓ Patient Portal
- ✓ Scheduling
- ✓ Appointment Management
- ✓ Billing Management
- ✓ Medical Templates
- ✓ Document Management
- ✓ Clinical Workflow
- ✓ EM Coding
- ✓ Insurance and Claims
- ✓ Lab Integration
- ✓ Patient History
- ✓ Reporting and Analytics
- ✓ e-Prescription
