EHRIN PRACTICE

TSI EHR

EXTENDED PROFILE

OVERVIEW

TSI Healthcare offers EHR solutions to a range of specialty practices. The EHR vendor offers specialty-specific templates which include voice and handwriting recognition technology.

In addition to the wide range of specialties served, TSI's solutions contain workflows specifically tailored to ophthalmology, rheumatology, and pulmonary medicine.

Custom methods of documenting and assessing patients are included in the software suite in addition to an online patient portal. These include specialty-specific templates, voice recognition, and handwriting recognition for when using a digitizer stylus.

EHR features include e-Prescribing, a special lab module to assist with order entry and automated results reporting, drag and drop functionality so that users can configure their own workflows, and in-office patient tracking to let staff keep on top of a patient's progress while he or she is in the practice.

TSI's solutions are designed to be integrated with other systems including lab and radiology systems, general hospital administration solutions, oncology solutions, and health information exchange solutions. Direct messaging is also available.

FEATURE OVERVIEW

✔ Patient Demographics

✔ Patient Portal

✔ Appointment Management

✔ Billing Management

✔ Medical Templates

✔ Clinical Workflow

✔ EM Coding

✔ Lab Integration

✔ Patient History

✔ Voice Recognition

✔ Patient History / EMR

✔ E&M Coding
