

VITALHEALTH EHR

EXTENDED PROFILE

OVERVIEW

VitalHealth was founded by the Mayo Clinic and the Netherlands-based Noaber Foundation to develop an eHealth solution that works well with chronic diseases such as diabetes, COPD, or Alzheimer's.

VitalHealth's EHR is offered as part of the Mayo Medical Lab outreach technology - but VitalHealth itself is a separate Milwaukee-based company and is working in cooperation with the clinic.

The platform is designed to support small medical practices, the needs of these small practices are addressed within VitalHealth EHR via point-of-care decision support, help with population management, specialized reporting, and ordering of results from diagnostics tests.

The platform offers a range of features, including appointment management, document management, clinical workflow, patient history and notes, and healthcare analytics. The aims of these are to improve outcome measurement, increase patient engagement and facilitate care coordination and healthcare analytics – all of which are designed to integrate with your wider practice management EMR.

VitalHealth EHR is a cloud-based platform, with native iOS and Android apps available for mobile use. It is possible to use the software through both wi-fi and 3G network access whilst remaining HIPAA-compliant.

SOFTWARE SPECIFICATION

OVERVIEW	
PRODUCT NAME	VitalHealth EHR
ADDITIONAL INFORMATION	
IOS APP	✓
